23.   Problem: (use additional Sheets if necessary)
The baseline version of Open Client 12.0.0 is the GA version. We are starting to see hanging processes and core dumps. Sybase recommends applying the lastest ebf to Open Client as some of these problems have already been addressed in previous ebfs.

24. Proposed Solution: (use additional sheets if necessary)
Create a test environment for Open Client.   The directory name should be V12.0.0EBF. The V12.0.0 files for sgI should be copied in the the new directory and then apply the Open Client EBF 9921 patch.

The tar file is ebf9921.tgz checksum information is 873832775 5059309

25. Alternate Solution: (use additional sheets if necessary)
None

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Continued core dumps and hangings.

27. Justification for Emergency (If Block 15 is "Emergency"):
Want this to be part of the phase I build which is the evening of 1/29/01
